What the press agents say about Pendleton's present and coming attractions.

Many Animals With Show.
A vast number of circus goes rush through the menagerie with scarcely a look at the animals, intent on getting into the "big-top," or main tent, in order to "get a seat," as they say. Even though one cannot secure a seat in the main tent, one might better view the exhibits in the menagerie at length. But in John Robinson's Ten Big Shows, which will appear in Pendleton, June 14, afternoon and evening, one can take one's time inspecting the peerless zoological department resting assured that a good seat is available in the big tent, the seating capacity of which is said to be five thousand.

The time expended in observing the splendid specimens of animal life displayed in the modern circus menagerie is returned a thousand fold in the grand educational lessons in zoology. In this menagerie may be seen the best specimens of every species of animal if extant.

The circus menagerie is a great educational factor and is doing more to instruct young America in the matter of zoology than all the country's text books on the subject.

So remember these facts when you attend the circus and make a careful inspection of the menagerie.

COAT BUTTON COMING OFF THAT WEIGHS 50 POUNDS

PHILADELPHIA, April 24.—The possibility that bronze old William Penn, who tops City Hall tower, 500 feet in the air, will drop a 50 pound metal button from his coat onto the heads of pedestrians, has caused the authorities to employ steeplejacks to make a thorough inspection of him.

A preliminary investigation developed that in addition to the loose button several big bronze rosettes about the base of the statue also are in danger of falling off. Philadelphia girls, while loving flowers, would not care to have one of these bouquets thrown at them.

Tells Her Experience To Benefit Others

MRS. DUNLAP SENDS A LETTER ADDRESSED TO THE READERS OF THE PAPER.

A sense of duty to others who might suffer as she had impelled Mrs. R. C. Dunlap, of Dekalb, Mo., to send the following signed statement to the St. Joseph, Mo., News Press:

"The readers of the News-Press especially those suffering from gallstones, stomach trouble and appendicitis, will find in Fruitola and Traxo a permanent cure. After suffering for three years the most excruciating pain from gallstones I found this wonderful remedy and am now in perfect health and have been for almost four years. Never have any symptoms of the old trouble. I had been told by three doctors that nothing but an operation would save me. I know several who have undergone an operation but still have gallstones. This medicine is an oil which softens the stones and cures the liver. It can be bought at any drug store."

Fruitola is an internal lubricant that softens the congested masses, disintegrates the hardened particles that cause so much suffering, and expels the accumulation to the patient's great relief. Traxo is a tonic-alternative that acts on the liver and kidneys, stimulates the flow of gastric juices to aid digestion, and removes bile from the general circulation.

Fruitola and Traxo are prepared in the Pinus laboratories at Monticello, Ill., and arrangements have been made to supply them through representative druggists. In Pendleton they can be obtained at Tallman & Co., 421 Main street.

The Inner Secret of New Post Toasties

A glance at one of these new corn flakes reveals novel, little bubbles which are raised by the quick, intense heat of a new process of manufacture.

These bubbles are an identifying feature of these—the only corn flakes with a self-developed, delicious corn flavour—the only flakes that do not have to depend largely on cream and sugar for palatability.

Try some of the New Post Toasties dry—they're good that way—the children munch them like candy. But of course the delicious new flavour is more pronounced when the flakes are served with sugar and cream.

The New Post Toasties do not waste into "chaff" in the package, and they don't mush down in cream like other flakes. They're a vast improvement over old-fashioned corn flakes and have met with enthusiastic approval everywhere.
